The UCL Centre for Digital Humanities brings together people from a wide range of disciplines to develop research and teaching in a vibrant multidisciplinary field.

Digital humanities research takes place at the intersection of digital technologies and humanities. It aims to produce applications and models that make possible new kinds of research, both in the humanities disciplines and in computer science and its allied technologies. It also studies the impact of these techniques on cultural heritage, memory institutions, libraries, archives and digital culture.

The Centre for Digital Humanities is able to capitalise on UCL's world-leading strength in information studies, computing science, and the arts and humanities. It brings together work being done in many different departments and centres, including the university's library services, museums and collections. The centre's location in central London, close to the

Social Media Knowledge Exchange

UCL is one of the institutions participating in the AHRC SMKE project led by the University of Cambridge. This is a collaborative project that aims to give research students and early career researchers in the Arts and Humanities opportunities for knowledge exchange with social media practitioners in academia, museums, archives, libraries, and the voluntary sector. The coll...

Welcome to HATII

Established in 1997 HATII builds on over 50 years of innovation in the use of information and communication technology in the arts and humanities at the University of Glasgow and is internationally renowned for its research and teaching.

- Internationally recognised for interdisciplinary research in:
 - Digital Curation
 - Digital Humanities
 - Theoretical Approaches to Information
 - Philosophy of Technology
 - Archive, Records and Information Management
- 4th in the UK for world leading research (2008 RAE)

Birmingham

The screenshot shows the homepage of the Canterbury Tales Project. At the top left is a medieval manuscript image with a large blue initial 'W'. To its right is a snippet of text from Chaucer's *Canterbury Tales*. Next is a phylogenetic tree diagram. To the right of the tree is the project's logo: "The Canterbury Tales PROJECT". Below the logo is a navigation menu with links: HOME (highlighted in dark teal), STAFF, PARTNERS, PUBLICATIONS, RESOURCES, MEET US, HISTORY, MASS DIGITIZATION, and LINKS.

The main content area contains the following text:

The Canterbury Tales Project aims to investigate the textual tradition of Geoffrey Chaucer's *Canterbury Tales* to achieve a better understanding of the history of its composition and publication before 1500. Here is how we work:

- We have established a system of transcription for all the manuscripts and early printed books of the *Canterbury Tales* into computer-readable form.
- We transcribe the manuscripts using this system.
- We compare all the manuscripts, creating a record of their agreements and disagreements with a computer collation program (*Collate*).
- We use computer-based methods, some drawn from evolutionary biology, to help reconstruct the history of the text from this record of agreements and disagreements.
- We publish all the materials, the results of our analysis, and the tools which we use in electronic form.

On the right side, there is a "NEWS" section with three items:

- New Canterbury Tales Project website active.

Announcing:
**TAPoR Portal
Version 1.0**

TAPoR Home / Welcome Monday June 18, 2012

TAPoR
Text Analysis Portal for Research

TAPoR will build a unique human and computing infrastructure for text analysis across the country by establishing six regional centers to form one national text analysis research portal. This portal will be a gateway to tools for sophisticated analysis and retrieval, along with representative texts for experimentation. The local centers will include text research laboratories with best-of-breed software and full-text servers that are coordinated into a vertical portal for the study of electronic texts. Each center will be integrated into its local research culture and, thus, some variation will exist from center to center.

University
of Victoria

British Columbia
Canada

The Digital Humanities Summer Institute at the University of Victoria provides an ideal environment for discussing and learning about new computing technologies and how they are influencing teaching, research, dissemination, and preservation in different disciplines.

During a week of intensive coursework, seminars, and lectures, participants share ideas and methods, and develop expertise in using advanced technologies. Every summer, the institute brings together faculty, staff, and students from the Arts, Humanities, Library, and Archives communities as well as independent scholars and participants from industry and government sectors.

Described by one participant as an event that "combines the best aspects of a skills workshop, international conference, and summer camp," the DHSI prides itself on its friendly, informal, and collegial atmosphere. We invite you to join the DHSI community in Victoria for a week of practice, learning, and connecting with friends and colleagues.

DHSI makes its announcements via the [DHSI e-mail list](#) and [DHInstitute](#) on Twitter, as well as other venues.

Announcements

HEARTFELT THANKS ... !!!

...to the 400+ who joined us this year and made DHSI 2012 the fabulous experience it has been! See you next year!

ALREADY THINKING ABOUT DHSI 2013?

DHSI will run 10-14 June 2013, and course listings, registration, & the scholarship application module will be available soon! Keep an eye on this space ;).

* DH TRAINING NETWORK EMERGING *

We're pleased to announce that DHSI, [DH@Oxford](#) (2-6 July 2012), [DH@Leipzig](#) (23-31 July 2012), and [DHWI](#) (7-11 Jan 2013) are working together to establish a network of DH training institutes, with more locations to be announced soon. Please see our partners' offerings!

Le Dictamen dans tous ses états

Mis en ligne le 7 juin, 2012 - 09:02 [View]

L'école pratique des hautes études, section des sciences historiques et philologiques, « Savoires et pratiques du Moyen Âge au xixe siècle » et l'université Paris 1-CNRS, « Laboratoire de médiévistique occidentale de Paris » organisent un colloque international **le 5 et 6 juillet 2012** à l'IRHT sur le thème du « *Dictamen* dans tous ses états. Perspectives de recherches sur la théorie et la pratique de l'*ars dictaminis* (xi^e-xve siècles) ».

L'*ars dictaminis*, ensemble de techniques de rédaction latines créées entre 1070 et 1250 pour répondre à de nouveaux besoins de la société médiévale, jouit depuis deux décennies d'un regain d'attention notable. Art rhétorique cultivé par les différentes autorités ecclésiastiques et laïques durant la plus grande partie du bas Moyen Âge, l'*ars* a profité de l'intérêt accru pour l'histoire des techniques de communication. Peut-on dire pour autant que l'étude de ce courant central de l'écriture médiolatine est réellement sortie d'un enclavement séculaire ?

Cléo

The screenshot shows the homepage of the Cléo website. At the top, there is a navigation bar with links to **openedition**, **revues.org**, **calenda**, and **hypotheses.org**. To the right of these are links for **Lettre & alertes** and **Freemium**, followed by a search bar labeled **Rechercher**. Below the navigation bar, a breadcrumb trail indicates the current page: **Centre pour l'édition électronique ouverte**.

The main header features the **cléo** logo on the left, consisting of the word "cléo" in white lowercase letters next to a white document icon, all set against a green background. To the right of the logo is the text "Centre pour l'édition électronique ouverte". On the far right of the header is a stylized graphic of a document or cloud composed of small white squares.

The page has a blue header bar with the word "Accueil" in white. Below this, there are two main sections: "PRÉSENTATION" on the left and "Le Cléo" on the right. The "PRÉSENTATION" section contains links to "Missions du Cléo", "Les institutions fondatrices", "BSN", "Bienfaiteurs et cotisants", "Les partenaires", "Pilotage", and "Le Conseil scientifique du Cléo". The "Le Cléo" section contains text about the center's history and services, mentioning the CNRS, EHESS, Aix-Marseille University, and Avignon University, and its presence in Marseille, Paris, and Lisbonne. It also describes the development of OpenEdition and its four platforms: Revues.org, Calenda, Calenda+, and Hypotheses.org.

Würzburg

The screenshot shows the homepage of the Würzburger Zentrum für Digitale Edition. At the top, there is a navigation bar with links for Universität, Fakultäten, Forschung, Lehre, Einrichtungen, Zielgruppen, and International. On the right side of the header, there are links for Login and Kontakt, and a search bar. The main content area features a sidebar on the left with links for Über uns, Forschung, Lehre und Weiterbildung, Service, Veranstaltungen, Kontakt, and TEI MM 2011. The main article discusses the Zentrum für digitale Edition as an interdisciplinary network at the University of Würzburg. It highlights its role in connecting departments of the Faculty of Arts, Informatics, and Library, and its support for current and future digital edition projects. Below this, a section titled "Lesen Sie hier mehr zu:" lists four research projects and their involvement with the ZDE. A horizontal line separates this from another section about a Humboldt-Stipendiatin's research at the ZDE.

TEI MM 2011

Würzburger Zentrum für Digitale Edition

Das Zentrum für digitale Edition ist ein interdisziplinärer Verbund an der Universität Würzburg zur Erforschung computergestützter Methoden in den Geisteswissenschaften. Es führt die im Lebenszyklus digitaler Editionen benötigten Kompetenzen aus den Bereichen der Geisteswissenschaften, Informatik und Bibliothek zusammen und unterstützt künftige und laufende Editionsvorhaben der Universität Würzburg und ihrer Partner. Das Zentrum für digitale Edition versteht sich somit als offenes Kompetenzzentrum mit dem Ziel der interfachlichen Vernetzung der historischen und philologischen Wissenschaften und als Kooperationsplattform für die Zusammenarbeit mit anderen Fakultäten. Germania: TextGrid

The screenshot shows the homepage of the TextGrid website. At the top left is the logo "TEXT GRID". At the top right is the D-Grid logo featuring a map of Germany and the text "D-GRID". Below the header, there are language links "DE" and "EN". A sidebar on the left contains a vertical menu with links: Startseite, TextGrid Laboratory / Software Download, TextGrid Repository, TextGrid Summit 2012, Digitale Bibliothek, Über TextGrid, Berichte & Publikationen, Veranstaltungen, Newsletter, Pressemappe, Impressum & Kontakt, and Interner Bereich ». The main content area has a breadcrumb trail "> TextGrid". A section titled "TextGrid – Virtuelle Forschungsumgebung für die Geisteswissenschaften" describes TextGrid as a research network supporting the humanities. It mentions its goal of providing access and exchange of information through modern grid technology since 2006. Another section discusses the development of a virtual research environment for philologists, linguists, musicologists, and art historians, involving various partners and funded by BMBF. A cartoon owl character is shown with a "2.0" speech bubble, marking the Textgrid Summit 2012.

TextGrid – Virtuelle Forschungsumgebung für die Geisteswissenschaften

TextGrid ist ein Forschungsverbund, dessen Ziel es ist, den Zugang und den Austausch von Informationen in den Geistes- und Kulturwissenschaften mit Hilfe moderner Informationstechnologie (Grid) zu unterstützen. Seit 2006 wird eine internetbasierte Plattform aufgebaut, die Wissenschaftlern Werkzeuge und Dienste für die Auswertung von textbasierten Daten in unterschiedlichen digitalen Archiven bietet – unabhängig von Datenform, Softwareausstattung oder Standort.

TextGrid entwickelt eine Virtuelle Forschungsumgebung für Philologen, Linguisten, Musikwissenschaftler und Kunsthistoriker. Das TextGridLab, ein intuitiv bedienbarer Einstiegspunkt, bietet Zugriff auf fachwissenschaftliche Werkzeuge, Services und Inhalte. Das TextGridRep, ein fachwissenschaftliches Langzeitarchiv, eingebettet in eine Grid-Infrastruktur, garantiert die langfristige Verfügbarkeit und Zugänglichkeit der geisteswissenschaftlichen Forschungsdaten. Das Verbundforschungsprojekt TextGrid ist Teil der D-Grid Initiative und wird von Juni 2009 bis Mai 2012 vom Bundesministerium für Bildung und Forschung (BMBF) gefördert (Förderkennzeichen: 01UG0901A).

Eine Einführung in die Thematik bietet der Film "Virtuelle Forschungswelten: Neue Technologien in den Geisteswissenschaften", der im Auftrag der D-Grid GmbH in Kooperation mit TextGrid
